

The background of the poster features a blurred photograph of a coastal scene. In the center, a white lighthouse sits atop a small island or pier. A blue fishing boat is visible in the water in front of the lighthouse. To the right, a close-up, out-of-focus detail of a fishing net with dark mesh and green ropes is visible. The sky is a clear, bright blue.

# The Future of our Inshore Fisheries Conference

#FutureOfOurInshoreFisheries  
Tuesday 8 and Wednesday  
9 October 2019, London  
Free to attend

**Fishermen are invited to bring their experience and ideas to a special conference\* which will shape future management of inshore fisheries.**

- Come together with fellow fishermen and industry leaders, government, academics and other interested parties.
- Hear specially commissioned research on the inshore sector and different models of management.
- Lay the foundations for a collaborative management approach which ensures our marine environment and coastal communities are sustainable and thriving into the future.

**For further information and to book your place visit [www.seafish.org](http://www.seafish.org)**

There will be a limited number of bursaries/funding available for fishermen to cover attendance costs. Please contact **Holly Kaiser on 0131 558 3331 or at [holly.kaiser@seafish.co.uk](mailto:holly.kaiser@seafish.co.uk)** for further information.

\*This conference has been organised by an industry-led steering group, which includes the NFFO, SFF, SWFPA, the Coastal Producer Organisation, Clyde Fishermen's Association and ANIFPO.
